SEE Beyond With FullRange Optics

Lowest Straylight

Straylight research conducted using the FullRange lens shows that its straylight is the lowest tested in the industry.

This is due to the clarity of the lens, lack of glistening and the low refractive index of the lens material.

Contrast Sensitivity

Due to its Aspheric optical design profile, clinical results of the FullRange lens show superior contrast sensitivity leading to contrast sensitivity comparable to a monofocal IOL as presented by Prof. J.L. Alio

Contrast sensitivity function comparison between groups. It shows comparison of the postoperative contrast sensitivity function in both groups of patients under photopic and scotopic conditions.
